

More Than Just A Comprehensive Digital Health Ecosystem

30,000+ Healthcare Facilities

Spanning across the globe, we have an expansive network ensuring that health professionals and facilities are interlinked, providing optimal patient care.

250 Million+ Daily Transactions

Our platform handles an immense volume of transactions every day, attesting to its efficiency, reliability and the trust the global community places in us.

72 Million Active Users

With a continually growing user base, Tiga is not just a platform; it's a community of health professionals and patients alike, striving towards better health outcomes.

33 Billion+ Pharmaceuticals

From prescription drugs to over-the-counter solutions, we've digitized and categorized billions of pharmaceuticals, making it easier for healthcare professionals to prescribe and for patients to understand their medications.

9 Billion+ Health Records Processed

Our commitment to digital transformation means that patient records are not only digitized but are also easily accessible and securely stored.
125 Million Patients

125 Million Patients

We are honored to serve a vast community of patients, providing them with the tools and resources they need for better health outcomes.

2.2 Million+ Daily Prescriptions

Every day, millions trust us with their prescription needs, further establishing our reputation as a leading healthcare IT solution.

And why are we doing this?
Because we want to shape the future together!
